

## Keeping you safe at home

### As we get older the risk of having an accident at home increases significantly

Bishop Creighton House can help by visiting your home and conducting a free home safety assessment. If any work is necessary to minimise the risk of a home accident this can be completed for a fee of £10 (free to those receiving a means tested benefit). We can also carry out free security and fire safety checks to ensure you are not at risk of burglary or a house fire.

This service is for people aged 65 or over and those with a disability who live in H&F.

All our staff are fully trained and DBS checked.
