

Keeping children safe at home

Every year 28,000 children under five are admitted to hospital after having an accident at home.

Bishop Creighton House can help families in Hammersmith and Fulham make their homes safer for under fives and all children with disabilities.

We carry out home safety assessments and provide advice, literature and equipment, which we fit. This can include stair gates, cupboard locks and window restrictors.

This service is completely **free** to families on means tested benefits.

All our staff are fully trained and DBS checked.
