

# Older People's Virtual Social Club

This new initiative will assist older people to use Zoom, FaceTime or other video conferencing technology to develop a befriending network supported by volunteers and to develop a peer support group for older people. We will refer older Londoners to other agencies as needed for food and prescription deliveries, connecting them to health services, helping them to get financial advice to make sure no one falls between the gaps.

We will also encourage intergenerational support through regular sharing of letters, poems, drawings and messages of hope to older neighbours and relatives.
